DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10-31-07 has been entered.

Response to Submission

2. Applicant's arguments, see pages 7-9, filed 7-9-07, with respect to the claims is persuasive further in view of the examiner's amendment. It is noted that applicant had perfected the priority in the parent application with filing of an English translation of the Japanese priority document.

EXAMINER'S AMENDMENT

3 An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Harding on 9-17-07 and 3-3-08.

The application has been amended as follows:

In claim 1, line 7, delete "contacting" and replace with --washing--;

In claim 1, lines 7-8, delete "or a buffer solution comprising a pH of about 7";

In claim 1, line 10, after "or more" insert – whereby increased wettability of the plastic article does not vary with time--;

In claim 51, delete " 80° " and insert in place thereof --78° and greater than about 28° -----

Cancel claim 54.

Allowable Subject Matter

4. Claims 1, 3-7, 10-14, 39-59, 51-53 are allowed.

Reasons for allowance

5. The following is an examiner's statement of reasons for allowance:

The present invention includes independent claim 1. Claims 1 recites a method for surface treatment of a plastic article.

McGee et al is considered the closest prior art McGee et al discloses a method for surface treatment of a plastic article. A step of immersing in an aqueous solution, free of coupling agents and comprising as a first polymer a carboxyl functional polymer having a weight average molecular weight of 200 or more, wherein the step of immersing is prior to any pretreatment, and further immersing the plastic article in an aqueous solution of a second polymer having a weight average molecular weight of 200 or more.

McGee et al does not disclose the claimed combination including:

In claim 1:

immersing said plastic article in a first aqueous solution having a pH of 4 or less, and comprising as a first polymer a carboxyl functional polymer having a weight average molecular weight of 200 or more to form a plastic article-first polymer complex, and

washing said plastic article-first polymer complex with purified water, and immersing said plastic article-first polymer complex in an aqueous solution of a second

Art Unit: 1792

polymer having a weight average molecular weight of 200 or more whereby increased wettability of the plastic article does not vary with time.

For these reasons claim 1 is deemed to be allowable over the prior art of record, and claims 3-7, 10-14, 39-59, 51-53 are allowable by dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
